

COVALENCE[®] HTLP60-DCS 3 LAYERS

Product Information

Product description: Covalence[®] HTLP60-DCS system is a wraparound heat-shrinkable sleeve which replicates the structure and the performance of factory applied three-layer polyolefin coatings.

Construction: Three-layer system

- First layer(optional): Liquid epoxy, solvent-free two-component.
- Second layer. High shear strength copolymer adhesive.
- *Third layer*. Radiation cross-linked, high density polyethylene with permanent Change Indicator (PCI).

During installation, the epoxy is applied to the prepared pipe surface and the heat-shrinkable sleeve is immediately wrapped around the joint over the wet epoxy. Heat is then applied to the sleeve which shrinks to form a tight fit around the joint. While curing, the epoxy forms strong mechanical and chemical bonds to the pipe surface & to the copolymer adhesive layer. The cross-linked outer layer forms a tough barrier against mechanical damage and moisture transmission. Note HTLP60-DCS can also be applied as 2-layer coating without liquid epoxy. See PDS HTLP60-DCS-2 LAYER for more info.

Features:

- Fully resistant to shear forces induced by soil and thermal movements.
- Sleeve applied over wet epoxy, allowing fast installation and formation of strong mechanical & chemical bonds.
- Superior cathodic disbondment and hot water immersion resistance.
- Fully reconstructs the coating of three-layer coated pipes.
- Dimpled backing provides a "permanent change" indicator for application of heat.

Benefits:

- The HTLP is tough & lasts as long as a 3-layer, factory applied coating.
- Allows fast application combined with high performance.
- Offers the optimum barrier protection against corrosion.
- HTLP systems allow three layer coated pipelines to have a virtually monolithic coating system.
- Dimpled backing allows easy post-heat inspection and offers a reliable inspectability at any time.

Product selection guide	
Max operating temperature	65°C (149°F)
Compatible line coatings	PE, PP
Min. preheat temperature	70°C (158°F)
Recommended pipe preparation	Sa 2½
Soil stress restrictions	None
Performance	EN 12068 C50 UV

Product order information

Covalence® HTLP60-DCS products are available

- As cut piece (pre-cut, no cut corners, with separate closure patch)
- As Uni-sleeve (pre-cut, with cut corners, with attached closure patch)
- As a roll (closure patches to be ordered separately) _

Select sleeve width that will overlap onto the mill-applied coating by 50 mm (2 inches) minimum on each side of the weld joint. Take a 10% shrinkage during installation of sleeve into account when calculating minimum sleeve width.

Cut piece /	Cut piece / Uni-sleeve			
Example				
	Designation	Standard ordering options		
450	Sleeve width (mm)	450 mm (17.75") 500 mm (19.75")		
DN200	Outside pipe diameter	DN50 – DN1500 (2.375" – 60.000")		
/E	Product thickness	/E /C /F		
UNI	Designates pre-attached closure patch	Optional		
Roll form (closure patch to be ordered separately)				
Example	HTLP60-DCS-450X30M/C-			
	Designation	Standard ordering options		
450	Sleeve width (mm)	450 mm (17.75") 500 mm (19.75")		
30M	Roll length	30M (100ft)		
/C	Product thickness	/E /C /F		
	Rolls can have a splice. Max 10% of the roll order will have a splice. Min partial length will be 5M or 15 ft.			
Closure pa	tches (to be ordered separa	tely)		
Example	WPCP-IV-4x17(S50)			
	Designation	Standard ordering options		
4	Patch width (in.)	4 (100 mm) 6 (150 mm) 8 (200 mm)		
17	Patch length (in.)	17: 450 mm (17.75") 20S: 500 mm (19.75")		
(S50)	Packaging quantity in plastic bag	50 pc		

General information	n
Product dimension	Sleeve cut lengths and appropriate closure patch widths depend on the pipe size and product construction, see latest application table AT- GIRTHWELD.
Installation guide	For proper product installation, see latest application guideline.
Recommended primer	HTLP60-DCS type products are installed with or without epoxy primer. When installed with epoxy HTLP60-DCS is installed with S1301-M Epoxy primers are ordered separately. For more ordering information on epoxy primers see latest PDS-S1301-M. As field application of primers may vary, consult a Seal For Life representative or Authorized Distributor for rate of coverage guidance.
Handling	Handle with care. Keep boxes upright.
Storage	Store indoor, clean and dry, away from direct sunlight in a cool place below +50°C. Unlimited shelf life.
Documentation	Extensive information is available on our web- site. Application instructions and other documentation can be obtained by contacting our head office, from our local distributor or by sending email to info@sealforlife.com
Certified staff	Application of the described coating system shall be carried out by certified personnel.
